TABLE OF CONTENTS

Introduction to the topic, page 8

Definitions, page 9
- Thermal energy harvesting
- Sub-watt thermal energy harvesting
- Elements of an energy harvesting system

1. Sub-watt TEG upstream ecosystem, page 13
- State of the art of thermoelectric technology
- Thermoelectric technology maturity
- Thermoelectric transducer manufacturers
- Maturity of thermoelectric manufacturers
- Thermoelectric Industry : market trends
- Market enablers
- Conclusion

2. Storage solutions actors & technologies, page 30
- Thin-film batteries & super capacitors
- Storage technologies manufacturers
- State of the art of storage technologies
- Maturity of storage manufacturers
- Conclusion

3. Methodology, page 37
- Research methodology
- Segmentation, qualification and quantification
- Applications ranking methodology
- Application introduction template
- OEM list : ranking methodology
- Market quantification and forecast methodology

4. Infrastructure & Building, page 44
- Infrastructure and building: segmentation & applications
- Application 1
- Application 2
- Application 3
- Application 4
- Serviceable market quantification summary

5. Industry & professionals, page 61
- Industry & professionals : segmentation & applications
- Application 5
- Application 6
- Application 7
- Serviceable market quantification summary

6. Consumer, page 75
- Consumer: segmentation & applications
- Application 8
- Application 9
- Application 10
- Serviceable market quantification summary

7. Transportation, page 89
- Transportation: segmentation & applications
- Application 11
- Application 12
- Serviceable market quantification summary

8. Medical, page 100
- Medical: segmentation & applications
- Applications in Medical
- Medical segment: conclusion

9. Conclusion on market applications, page 104

About Infinergia

- Established in 2009, Infinergia Consulting is a boutique market research and consulting company focused on clean electricity. We propose tailored consulting services and multi-client products on energy harvesting, photovoltaic, fuel cells and batteries.
- Infinergia has been involved for 6 years in supporting several innovations related to energy harvesting. We have are in relation with over 300 industrial and academic contacts in this domain and have interviewed over 70 in the scope of this report.
- Infinergia published 2 reports on Energy Harvesting. In 2013, Infinergia released a first report, called “Energy Harvesting Industry Analysis” focused on upstream industry on Kinetic, Thermal and RF technologies. This “Sub-Watt Thermoelectric Energy Industry & Market Report” is an update of the 2014 edition.
- The analysts and experts involved in the edition of this report cumulate 15 years of experience in this domain.

ORDER A COPY

- Delivery of the 110 pages report:
  - Electronic version (PDF & Excel tables)
  - Paper version available only on demand
  - Delivery Time: within 24 Hours (during working days)
- Single site license: 3 000 € + V.A.T
  - Each purchase includes a 1 hour analyst briefing session by telephone
- Corporate license: please call us
